EDUCATION

SRM University AP | 100% Merit Scholarship

B.Tech. in Computer Science & Engineering | CGPA: 9.64 / 10.0

Andhra Pradesh, India

Aug 2024 – May 2028

VidyaGyan School, Sitapur

Intermediate (Class XII) – 91.8% | High School (Class X) – 98%

Uttar Pradesh, India

Jun 2022 – Apr 2024

EXPERIENCE

Research Intern — Transformer-Based Sentiment Analysis — GitHub

Jun 2026 – Jul 2026

- Designed and executed a controlled comparative study benchmarking **5 transformer architectures** (BERT, RoBERTa, DistilBERT, ALBERT, ELECTRA) against **7 classical ML baselines** on a **60,000-sample** Amazon Polarity dataset, with fine-tuned **ELECTRA** achieving **95.75% accuracy/F1** — a **10.55-point** gain over the strongest traditional baseline (Logistic Regression, **85.20%**).
- Engineered a **unified Hugging Face** fine-tuning pipeline (PyTorch, WordPiece/BPE tokenization, 128-token sequence length) applying **identical 3-epoch training protocols** across all **5 transformer** backbones, alongside a parallel TF-IDF pipeline (**10,000 features**, 1–2 n-grams) powering all **7 traditional classifiers**.
- Built a modular, CLI-driven ML system spanning **12 total models**, with fixed-seed reproducibility, automated accuracy/precision/recall/F1 reporting, and real-time single-text inference — cutting manual model-switching effort via a single config-driven architecture.

TECHNICAL SKILLS

Languages: Java, C++, Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS, Socket.IO, Pandas, NumPy, Scikit-learn

Databases: PostgreSQL, MySQL, MongoDB

Cloud & DevOps: AWS (EC2, IAM, S3), Docker, Git, GitHub Actions, CI/CD

Tools: VS Code, IntelliJ IDEA, Postman

Core Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, REST APIs

PROJECTS

ConnectWell – Emotional Intelligence Platform — React, Node.js, MongoDB — GitHub

- Built a full-stack platform for mood tracking, AI-based tone analysis, and community interaction.
- Implemented JWT authentication with email OTP verification.
- Developed REST APIs and integrated Groq API for AI features.

WanderLust – Travel Platform — Node.js, Express, MongoDB — GitHub

- Developed a full-stack booking platform with authentication and role-based access.
- Implemented search, filters, favorites, and review system.
- Integrated Mapbox and Cloudinary with secure backend handling.

AI Article Summarizer — JavaScript, Gemini API, Chrome Extension (Manifest V3) — GitHub

- Built a Chrome Extension (Manifest V3) integrating Google's Gemini API to generate summaries in **3 formats**, supporting articles up to **5,000+ words** per request.
- Engineered a **7-stage** content-extraction pipeline with **20+ DOM filtering rules**, reducing webpage noise and improving summary quality.
- Designed a **privacy-first, zero-backend** architecture with BYOK authentication, generating AI summaries in **under 3 seconds**.

CERTIFICATIONS & ACHIEVEMENTS

Solved **330+ DSA Problems** on LeetCode & **195+ Problems** on CodeChef

MongoDB Certified Developer, Associate (C100DEV) – MongoDB

2026

Microsoft Learn AI Skills Challenge – Microsoft

2025

Awarded **100% Merit Scholarship** – SRM University AP

2024–Present

Shiv Nadar Foundation Scholar – Awarded 7-year Merit Scholarship (Class VI–XII)

2017–2024

Young Turks 2025 – Round 1 Qualifier (**97.34 Percentile**)

2025
